## Digital Lighting Systems, Inc.

## MF405-24DC

4 Channel "Mini-Fader/ Chaser"
4 independent inputs $4 \times 5 \mathrm{Amps}$
Voltage range: 6VDC to 24 VDC
$4 \times 5$ Amps outputs

## Lighting animation controller

## General Description

The MF405 is a four-channel lighting controller (Cross-Fader/Lighting animation) that operates on a range of VDC voltages from 6 VDC to 24 VDC and that is capable of producing slow level changes( Color Mixing ) as well as Quick ON/ OFF (Animation)

A Components diagram of the MF405 is shown in Figure 1. MF405 contains the equivalent of four solid-state relays (SSR) 4 dimmers, with 4 independent inputs and outputs. Each dimmer is rated at a maximum output current of 5 Amperes. The SSR dimmers are controlled by low-voltage DC signals from the logic circuit on the board. These signals are electrically-isolated by Optical couplers from the outputs.The MF405 logic board contains a microprocessor programmed to generate 16 user-selectable light sequences or patterns at an adjustable rate (the MF405 is also available with a "SPELLER" pattern or custom patterns upon request). A rotary selector is used to select the pattern and a second one is used to set the rate or speed. Patterns and speed can be monitored by four LED indicators for the outputs of the MF405.
Please contact the factory for additional information by telephone 1-305-969-8442 or email info@digitallighting.com

## MF405 Detail

## Figure 9- MF-45-24DC GENERALWIRING INSTRUCTIONS:

## Wiring Notes

- DO NOT EXCEED 120W @ 24 VDC or 60 W @ 12 VDC ( 5 Amps.) per dimmer output
- MF405-24DC dimmer Modules may be fed by 4 Class 2 Power supplies
- CAUTION: DO NOT attempt to parallel outputs to increase capacity.
- Installation must conform to local and/or NEC code requirements and must be performed by a qualified electrician.
- POWER EACH LOAD DIRECTLY BEFORE CONNECTING ITTO THE MF405-24DC TO ENSURE PROPER WIRING.

## Controls

The controls consist of two rotary 16 -position (0-9 and A-F) selectors. S2 (PATTERN) is used for selecting the desired Fade pattern. Positions $\mathbf{0}$ will scroll threw the patterns automatically to provide an ever changing light show. The MF405 outputs can be turned to static ON by selecting F. When $\mathbf{O}$ is selected, the MF405 goes into an automatic pattern change mode. All other positions cause the MF405 to play a single pattern indefinitely. $\mathbf{S 1}$ is used to select one of 16 individual Fade rates (Rate). Minimum speed is achieved by selecting position 0 . Speed doubles with each subsequent selector position.

## Indicators

LED indicators 1 to 4 indicate the status (On-Dimmed-Off) of their corresponding

## LIMITED WARRANTY

Digital Lighting Systems, warrants to the purFader that its products have been carefully manufactured and inspected and are warranted to be free from defects of workmanship and materials when used as intended. Any abuse or misuse contrary to normal operation shall void this warranty.

Digital Lighting Systems' obligation under this warranty shall be limited to replacement or repair of any units as shall within one year of date of invoice from Digital Lighting Systems, prove defective; and Digital Lighting Systems shall not be liable for any other damages, whether direct or consequential. The implied warranties of merchantability and fitness for a particular purpose are limited to the duration of the expressed warranty. Some states do not allow the exclusion of the limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. This warranty gives you specific legal rights, you may also have other legal rights which vary from state to state.

Defective merchandise may be returned to Digital Lighting Systems, prepaid, after prior notification has been given and approval obtained for the return. To obtain prior approval for the return of the defective items, contact your local Digital Lighting Systems distributor, representative, or:

Digital Lighting Systems, Inc.
Attn: Customer Service Department 12302 SW 128th ct, \# 105
Miami, FL 33186
(305) 969-8442

Upon request, replacement unit(s) will be shipped as soon as available. Unless immediate shipment of replacement merchandise is requested, Digital Lighting Systems will not ship replacement merchandise until defective merchandise is received, inspected, and determined to be defective.

No labor charges in connection with warranty problems will be reimbursed by Digital Lighting Systems without prior written approval from the factory.

Digital Lighting Systems distributors and representatives have no authority to change this warranty without written permission.

Digital Lighting Systems reserves the right to determine the best method of correcting warranty problems.
